New Product Release: Wireless Radio Remote Controls

Engineering & Manufacturing Solutions

Brand Hydraulics Co. announces the New V Series Radio Remote Control Transmitter Family and the New RP Series Radio Receiver. The V Series and RP Series are designed to allow for the operation of equipment from a distance for convenience and safety. The V Series transmitters are offered in 2 to 16 buttons and up to 32 functions with SHIFT button options. The RP Series receivers are offered in 4, 10 or 16 digital, bang-bang, output configurations. They are compact, durable, sealed and easy to operate radio controls. Our wireless controls are built with high quality long life components that are designed for use in harsh environments. We use the latest wireless and microprocessor technology including a 32-bit ARM-Core microprocessor to give these small controls some serious digital muscle. Our unique network design allows for operation of multiple units in the same location without interfering with each other.

All Brand Hydraulics Co. products are backed by lifetime technical support from the engineers at the Brand Hydraulics Co. manufacturing facility. Our electrical engineers are ready to assist you before and after the sale with technical support. Brand Hydraulics Co. products are backed by a 2 year Limited Warranty Policy. Please visit our website at www.brand-hyd.com for more information. Production quantities are available in stock and ready to ship.

Key Features:

- Engineered and manufactured in the USA
- 2.4GHz frequency with DSSS (Direct Sequence Spread Spectrum)
- Worldwide license free operation
- FCC, IC, CE certified by accredited independent laboratory
- Easy to operate and install
- Multiple systems may operate within the same area in close proximity without interference
- 32-bit ARM-Core Digital Microprocessor
- Yellow impact protective boot seal
- Sealed weatherproof control package
- Separate ON/OFF buttons standard
- Wireless pairing function
- Conformal coated transmitter circuit board
- Encapsulated waterproof receiver
- Factory configurable for custom applications
- LED diagnostic Indicators
- 1,600 ft. range line of sight
- Long battery life transmitter
- Universal for 12VDC or 24VDC systems
- Transmitter and receiver time-outs for safety
- All transmitter powered by a single coin cell battery
- Ergonomically shaped to fit the hand
- No perceivable delay between transmitter and receiver
- Custom membrane keypads available
- Other impact protective boot seal colors available
